After the due date, 10% will be deducted from your grade every day until you submit this. Learn more

Programming Assignment: Machine Problem 7 V2: HBase

You have not submitted.

Deadline Pass this assignment by Apr 6, 11:59 PM CDT

1. Overview

Welcome to HBase Machine Problem. This MP has both Java and python templates. Please use whichever yo prefer.

We recommend looking at the **Tutorial: Introduction to HBase** before beginning this assignment. Note that the tutorial refers to HDP 2.3 distro and is from 2015. Since then, we have discontinued using the HDP environment in our course, but reading the tutorial and becoming familiar with the concepts is still beneficia

2. General Requirements

Please note that our grader runs on a docker container **NOT connected to the internet**. Therefore, **no additional libraries are allowed** for this assignment. Also, you will **NOT be allowed to create any file or folder outside the current folder** (that is, you can only create files and folders in the folder that your solutic are in).

3. Set Up HBase
