Programming Assignment: Machine Problem 5: Spark MapReduce

Graded • **5/5 points**

Deadline Pass this assignment by Mar 9, 11:59 PM CDT

Instructions

1. Overview

Welcome to the Spark MapReduce programming assignment. You will implement the solution to this machin problem in Python. To work on this assignment, you need Docker Desktop installed.

2. General Requirements

Please note that our grader runs on a docker container **NOT connected to the internet**. Therefore, **no additional libraries are allowed** for this assignment **(you can only use the default libraries of Python but no pip installs)**. Also, you will **NOT be allowed to create any file or folder outside the current folder** (i.e., you can only create files and folders in the folder that your solutions are in).

3. Setup

Download the docker file, build a docker image and run it in a container. If you have already created container, do not create a new one.
